Our Mission

To make learning enjoyable for all!

Our Vision

Nurturing generations who seek knowledge.

Our Learning Philosophy

Imaginative and creative play is how children learn best, and it is key to drive life-long learning. While playing & engaging at the Museum, children are developing many critical skills, discovering their surroundings, and their role in the world.

The Exhibit Hall

The interactive exhibits inside our hall demonstrate various topics in a simple enjoyable way, so that children can learn through hands-on experience. Some of the exhibits are directly linked to what children learn in school.

Other exhibits simply aim to enhance children's skills and encourage inquiry-based learning. We want children to ask questions and to try to come-up with their own theories about how things work.

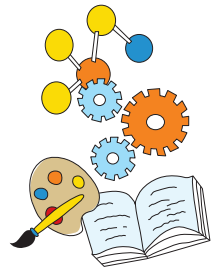

To ensure you have the best experience at the Museum, our Maintenance team make their maximum efforts to fix any faults in exhibits as soon as they occur. We also appreciate your support in keeping the exhibits in a good shape after using them.

In case of an accident, please reach out to any member of staff to help.

Educational Programs

We present to you year-round interactive activities to support your experience at the Exhibit Hall. That activities cover many topics in art, science, tinkering, literature, good citizenship and more. In addition to special activities for toddlers 1- 5 years old.

Please refer to the announced **daily program** or the Information Desk for details on hands-on activities & programs happening during your visit.

Annual Events

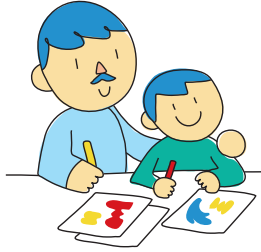

Over and above our daily program, the Museum offers key programs around the year such as:

- **The Annual Science & Arts Festival** during the Summer.
- **Celebrations:** marking Mothers' Day, Labor Day, Eid Al Fitr, Eid Al Adha and Christmas.
- **Community Connections:** special programs for Ramadan and other days for children to learn about.

Further information is available at the Information Desk.

Your Role as a Parent /Caregiver

We encourage a strong interaction between parents and their children as this is the best way for them to learn.

Play together with the exhibits, and let them lead the visit.

Learning inside the children's museums is based on self-discovery and free exploration, where parents and facilitator's engagement aims at encouraging the learning process.

Facilitators

They are our dedicated troupe of professional and well-trained explainers who help in enhancing your Museum's visit experience.

How to Get the Most Out of Your Visit?

Play freely

Use the instructional panels

Let your child lead the way

One adult for every 4 children

Enjoy your time

Spend enough time at each exhibit

Repeat your visit
